

# When the Night Begins to Shine by Mike Adams (Capo 3<sup>rd</sup>)

**Intro** G\*-----Em\*-----C-----D-----

## Verse 1

There's a calm out on the highway, like the world is holding tight.  
I've been running from the heartache, trying hard to get it right.  
But the dark won't last forever, not with hope so close behind.  
Something steady starts to rise up, like a promise in the sky.

## Chorus

When the night begins to shine, I can feel my heartbeat turning.  
All the doubts I carried with me, start to fade instead of burning.  
There's a glow across the distance, like it's calling out my name.  
Yeah, the night begins to shine and I'm not the same.

## Verse 2

I've been walking through the quiet, letting old thoughts take their turn.  
Some were heavy, some were gentle, each with something left to learn.  
But the road keeps getting brighter, as the hours roll on through.  
And I swear I see a glimmer, of a life I never knew.

## Chorus

When the night begins to shine, I can feel my heartbeat turning.  
All the doubts I carried with me, start to fade instead of burning.  
There's a glow across the distance, like it's calling out my name.  
Yeah, the night begins to shine and I'm not the same.

### Bridge

**C** Maybe all the broken moments, **G** led me right here to this place. **Em**  
'Cause the light that's breaking open, **C** feels like something I can chase. **D\***

### Verse 3

**G** Now the horizon's getting golden, and the weight begins to fall. **G**  
**Em** I can breathe a little deeper, stand a little more than tall. **Em**  
**C** All the stars that kept their distance, now are guiding where I go. **D**  
**C** And the path I couldn't follow, finally starts to show. **D**

### Chorus

**G** When the night begins to shine, I can feel my heartbeat turning. **G**  
**Em** All the doubts I carried with me, start to fade instead of burning. **Em**  
**C** There's a glow across the distance, like it's calling out my name. **D**  
**C** Yeah, the night begins to shine and I'm not the same. **G**

### Outro

**G** So I'll keep on moving forward, let the light fall where it may. **G**  
**C** Yeah, the night begins to shine and leads me today. **G**  
**C** Yeah, the night begins to shine and I'm not the same. **G {let fade}**
